Ductwork Triangles

Ductwork self adhesive triangles conform to DW144 regulations and are used to identify air type and direction of flow within an air handling system. As well as regulation colours the triangles also have text, so service confusion is a thing of the past. The triangles have a pvc face film with a permanent acrylic easy peel adhesive backing. They have excellent adhesion properties especially on synthetic materials and good resistance to water, oil and chemicals.

Product Specifications

Base Material	70 micron High performance film , polymeric plasticised.
Dimensions	150 x 150mm
Adhesive	Permanent , solvent based adhesive
Durability	5+ Years Outdoors
Temperature Range	-30°C to 90°C
Abrasion Resistance	Good
Water Resistance	Excellent
Chemical Resistance	Excellent

**** Suitability of the product should be independently determined prior to use***
